Guidelines for technical paper oral presentation at CTRG 2011

- Each author for technical paper will be given 12 minutes for the presentation followed by 3 minutes for questions and answers. Prepare the presentation (in Power Point) to fit the time frame and practice beforehand so that you do not run out of time.

- The slides should not be complex or over-crowded. For 12 minutes presentation, 10-12 slides may be adequate.

- Use standard fonts (such as New Times Roman, Arial, etc.) for preparing your presentation with suitable font size, colour and contrast to make it readable from back of the room.

- Please bring your presentation for CTRG session in Windows readable USB Flash Drive or in CD-ROM.

- All of the CTRG session rooms will be equipped with a LCD projector, screen, laptop computer and microphones.

- On reaching the conference venue, load your presentation onto the master computer, where all presentations will be stored session-wise.
